**Subject:** RM 10.9 Removal Action Status

Current status of Waterfront Development Permit additional information that was submitted on Friday:

- Dave Risilia was out yesterday and Friday so he is only today looking at the additional information that the CPG submitted on Friday.
- Dave Risilia did not have the original hard copy of the CPG's response letter and additional materials. According to Stan, his initial reaction was that the CPG was non-responsive. He was unaware that the electronic version was attached to our Friday email which was addressed to him. Suzanne pointed that out and he printed out the electronic version and will hunt down the original mailing later. He admits that the DEP mail room isn't always good at delivering things.
- Pete DeMeo (Flood Hazard Assessment) told Dave Risilia he can accept our explanation regarding the single Manning coefficient for a model's reach, but may want something "signed and sealed" by an engineer. Stan was told that DeMeo will probably reach out to him and tell him specifically what he wants from the CPG.
- Bill Potter received a letter from the Tidelands Resource Council that the RM 10.9 Removal Action is on the agenda for the May 1 meeting.
